Selling features:

- A classy handmade board using heritage construction techniques with modern deep gloss color tints.
 - Traditional custom-shaped polyurethane (PU) core.
 - 6mm Wood stringer.
 - Highest quality materials finished with a super deep gloss for a custom board finish.
- PU as a construction refers to a board built from a Polyurethane blank with Polyester resin, whilst PE refers to a Polyurethane Blank with Epoxy resin.

CSE

CSE is NSP's high-performance custom surf epoxy lay-up, with a UV-stable resin and satin rub finish. Clear UV-stable resin, CNC-cut and hand-shaped to detail by our very best craftsmen, CSE boards benefit from specific glassing schedules, carefully selected to get the most performance out of your CSE shape. This way, the perfect construction and layer combination makes it into your Shaper's Union surfboard.

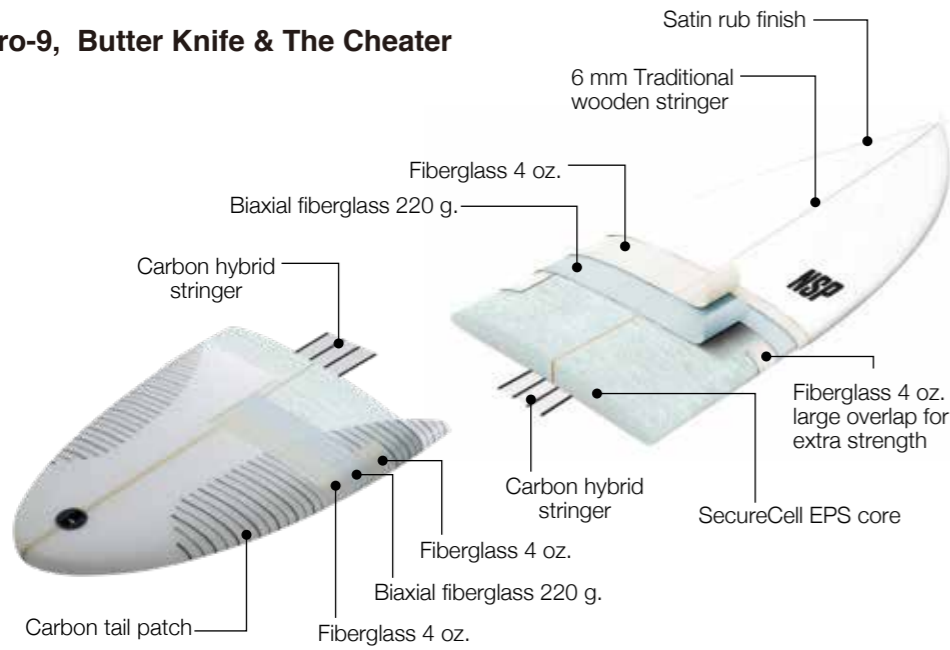

For more details, check out the product pages for the specific glassing schedules of the Chopstix, CSE Tinder-D8, the Butter Knife, The Cheater, the Pro-9 and the Equalizers. Selling features:

- P2 soft technology focuses on safety and ease of teaching.
- The P2 Core uses SecureCell EPS technology, fully glassed in a durable fiber epoxy shell with eco-friendly green epoxy resin.
- Finished with a polyethylene soft-top deck and HD slick bottom skin.
- All P2 Soft boards are fitted with high-end accessories for safety and ease of use.
- Rubber bumpers on nose and tail and neoprene handles on Surf Wide models greatly increase instructor board control.
- P2 Soft series offer an unbeatable return-on-investment for surf schools, venues and rental operators worldwide.
- P2 Soft boards come with durable, but easy-to-replace bolt through fins.
- All Surf Wide and Longboards in P2 Soft construction come with 2 additional fiberglass T-Stringers for maximum strength.

SOFT

TEACHER'S PET

持ち運びに便利なキャリーハンドル、パドルリグ・ポジションやスタンディングポジションのガイドラインなど、サーフィン・レッスンに必要な全てのアイデアが盛り込まれたスクール用ソフトボード。ソフトボードながら豊富なストリンガーと絶妙なロッカーラインを採用することでタワミがなくパフォーマンスも優れたデザインとなっている。

SUNDOWNER

6'6"-8'0"にはパフォーマンスに優れたFTUフィンボックスを採用し、9'0"にはワンタッチClick Finを採用。スクールやレンタルだけではなくファミリーユースやエキスパートのレクリエーションボードとしてもお勧めのフォーミーボード。

SUP TECHNOLOGY

NSP flax fiber is a highly-durable, reinforced fiber from the flax plant, helping us to reduce the use of conventional fiberglass in our manufacturing process.

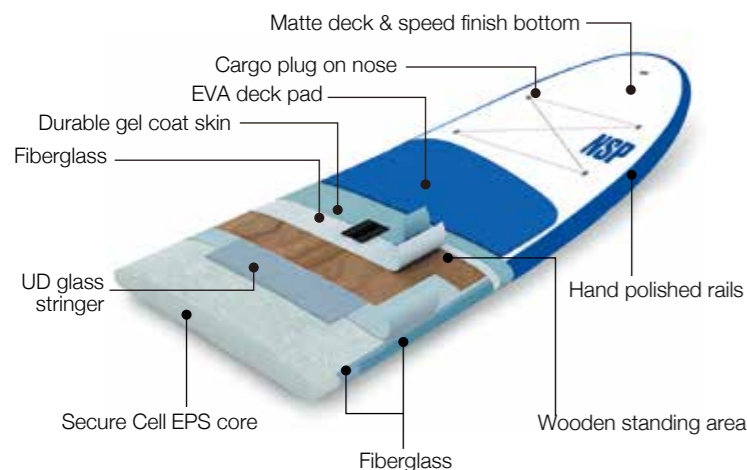

Selling features:

- Visually appealing with unmatched strength-to-weight ratio.
- Easy to carry because of its weight, easy to maneuver and paddle.
- Responsive flex and considerable strength to handle big conditions.
- Durable flax rails.
- 2019 Paddle Expo "Product of The Year" winner.

Elements

Durability, value and performance – the go-to board for any recreational paddler.

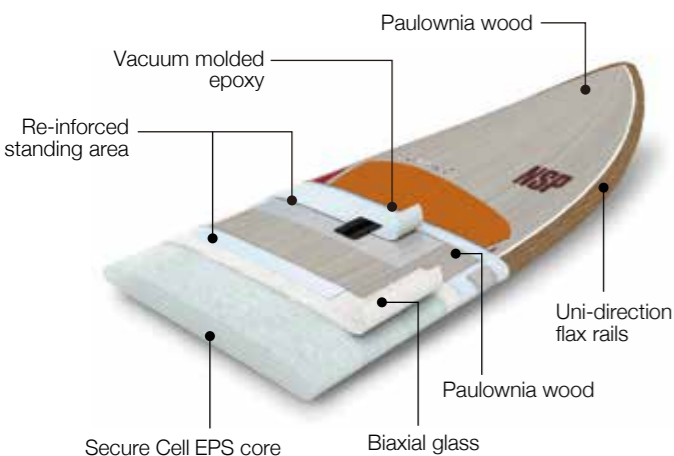

Selling features:

- EPS SecureCell core is wrapped in lightweight fiberglass and molded creating a durable shell.
- The ultimate choice for retailers looking to stock a single SUP range.
- Offers the recreational market proven performance shapes at attractive prices.
- Wide range of construction features, including bio-resin, an eco-friendly gamechanger.
- 3/4 Thermoformed EVA deck pad.

SLX_{FLAX}

Our high performance wave rider boards, are now even more lightweight, durable and eco-friendly. SLX technology delivers wave riding performance and reduced weight without compromising durability.

Selling features:

- Vacuum bonded SLX (Super Light Epoxy) core offers a light weight SUP surf option.
- Biaxial glass and Paulownia wood veneer deck for improved impact resistance.
- Uni-directional flax rails for superior flex control and increased durability.
- Eco-friendly option with SecureCell core, bio resin, Paulownia wood veneer and flax rails.
- NSP performance fins included.
- Available with all new FTU or FCS II fin boxes
- Swallow tail for extra maneuverability
- 4 speed channels - for extra speed on the wave.

The High Impact Technology (HIT) is the ultimate, worry free fleet board, great for schools, rental centers and personal daily use.

Selling features:

- Eco-friendly SecureCell EPS cores fully wrapped in military-grade fiberglass
- Extremely tough "bullet skin" increases longevity.
- Reinforced rail bands protects against paddle impact.
- Full deck thermoformed EVA for ultimate comfort.
- Ledge handle for easy carrying.
- Oversized locking hole integrated in the nose to secure your board(s) while in storage.
- Bungee cord on the nose.
- M8 screw insert available on all models to attach windsurf mast base.

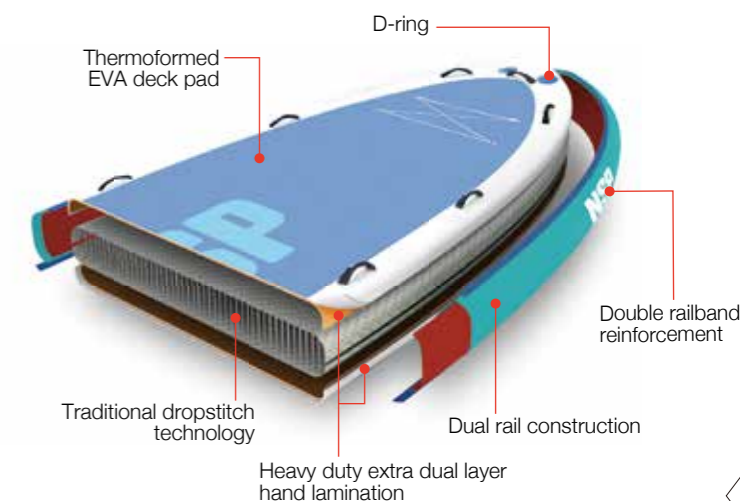

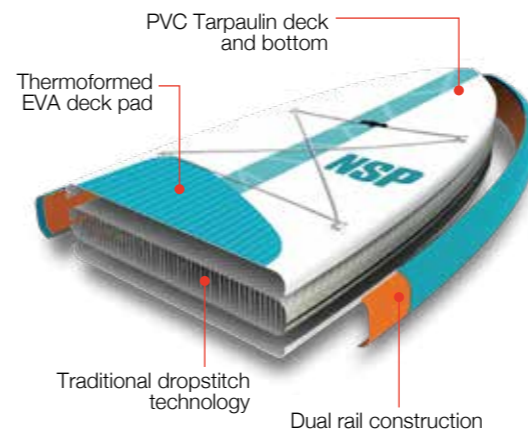

Strong, durable and easy to learn on, the P2 Soft boards are great for schools, rental centers and marinas.

Selling features:

- P2 technology focuses on safety first and ease of teaching.
- The P2 core is NSP's SecureCell EPS, fully glassed in a durable fiber epoxy shell with eco friendly bio-resin.
- Finished with a soft-top deck with protected rails and slick PE bottom.
- A solid rubber bumper on nose and tail minimizes potential injuries and wear-and-tear, and neoprene handles allow instructors to take control with ease.
- P2 series offers a proven return on investment for surf schools and rental operators worldwide.
- Easy to carry with handles on nose and tail as well as a ledge handle

NSPが安全性とスクーリングに最も力を入れ開発したソフトデッキ・シリーズ。ボディボード素材のソフトボードとは違い、EPSフォームに軍用レベルでも使用可能なファイバーグラスをラミネート。そのラミネートされたEPSフォームのデッキ面にはソフトトップのEVAパッド、ボトム面には耐衝撃性を持ちながらソフト素材で安全なPE SLICK(ポリエチレン樹脂素材)を使用。さらにレール部分にはパドルの衝撃を防ぐプロテクターが標準装備されている。ノーズとテイル部分にはラバー素材のバンパーとハンドルも装備。インストラクターがボードコントロールの補助を行ったり、スクール生が持ち運ぶときに非常に便利になっている。

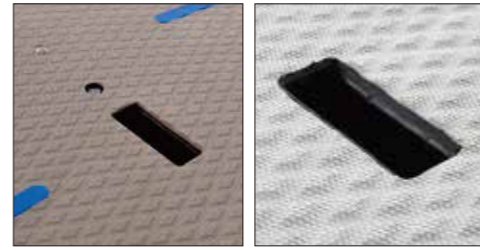

EPSフォームに軍用レベルでも使用可能なファイバーグラスをラミネート。スタンディング・エリアを補強した上に更にファイバーラミネートを施し、外皮には超衝撃耐性、超強度を誇る“BULLET SKIN”を使用。レール部分には通常のレールテープより遥かに厚手のNSPオリジナル・レールバンドが標準装備。ノーズに空けられた大きめのホールは、艇庫内でのボードの固定や、ビーチでのアンカリングに使用可能。HITはNSPラインナップの中でも、最高強度のレンタル・スクールユースボード。

SUP RACE TECHNOLOGY

Elite Pro Carbon technology construction when winning is all that matters!

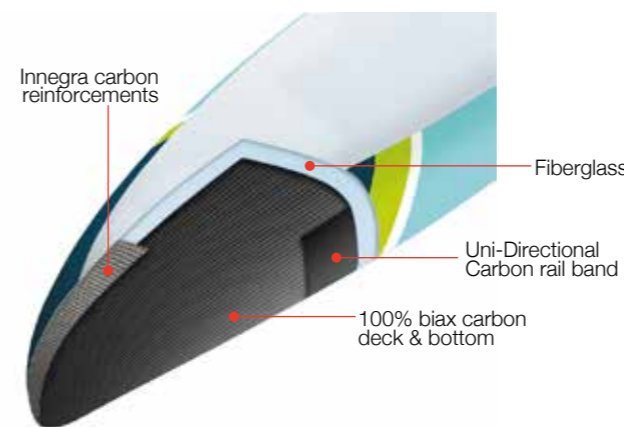

Carolina / Ninja / Sonic

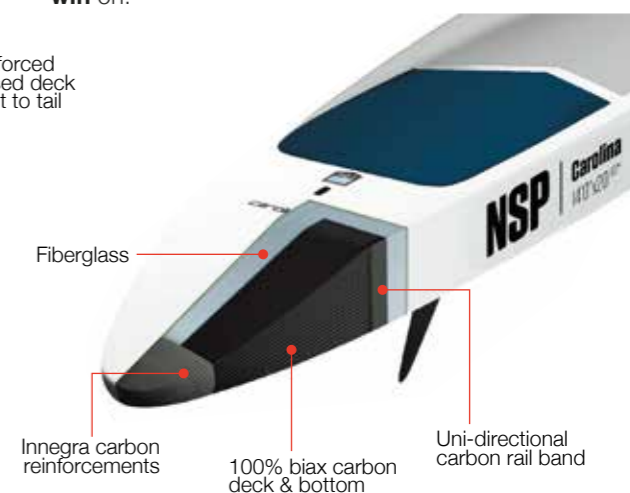

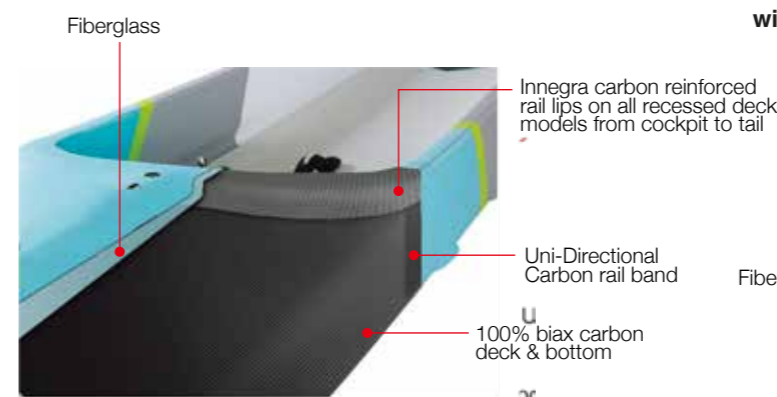

Puma

PRO CARBON Reinforcements

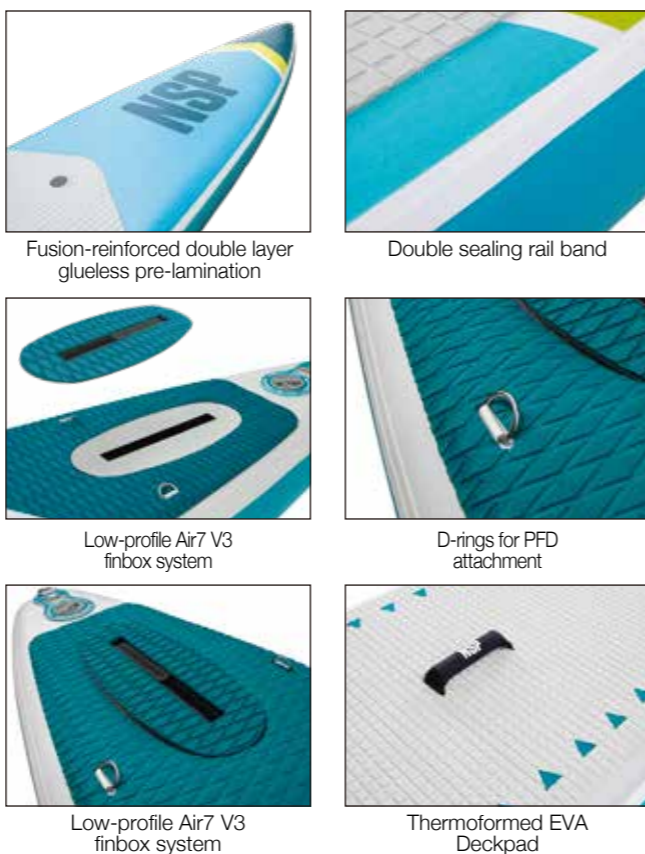

- Cutting edge aerospace carbon fibers and ultra-light core materials are combined with our unique vacuum construction, making Pro Carbon the lightest, stiffest and fastest racing construction technology available.
- Featuring a PVC reinforced deck for integrity plus carbon rails for stiffness reducing flex and making the board ultra responsive.
- Carbon Innegra reinforcement adds impact protection around rail lip, the nose and tail for close quarter battles at race starts and from the chasing racers in a draft train.
- Pro Carbon is an elite construction technology that is standard in our production race boards allowing you to own exactly the same boards that NSP pros **Travis Grant, Titouan Puyo, Annie Reickert and Ty Judson** win on.

KINGPIN SURF FOIL PRO

SURF FOIL PRO

SPITFIRE DOWNWIND FOIL PRO

SPECIAL FEATURES

Twin track / foil tuning guide
Center ridge and foot strap inserts

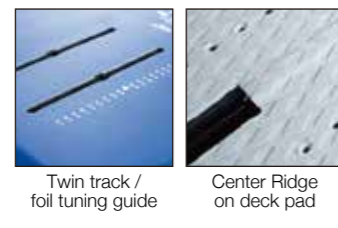

Tail kick pad with center arch and side wedges

Uni-directional carbon stringer deck

SPECIAL FEATURES

Twin track / foil tuning guide
Center Ridge on deck pad

Tail kick pad with side wedges and foot strap inserts

Center ridge

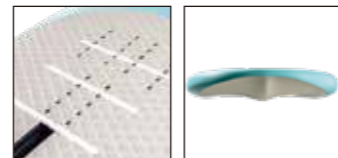

SPECIAL FEATURES

Twin track / foil tuning guide
Tail kick pad with Footstrap inserts

UD Carbon stringer

Multiple foot strap options

SPECIAL FEATURES

Double rail band
Full carbon pre-preg mounting plate

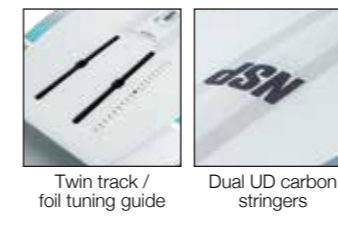

Footstrap V-shaped inserts
Thermoformed diamond grooved EVA deckpad with kicktail

3x footstrap included
High capacity double action pump

SPECIAL FEATURES

Twin track / foil tuning guide
Dual UD carbon stringers

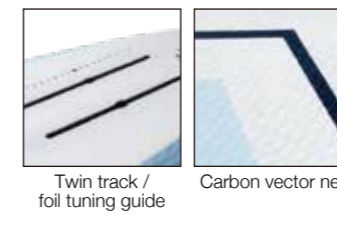

Tail kick pad with Footstrap inserts

Concave & Chined rails

SPECIAL FEATURES

Twin track / foil tuning guide
Carbon vector net

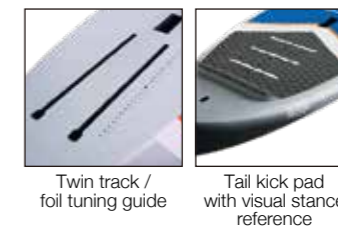

EVA tail pad with center arch and side wedges

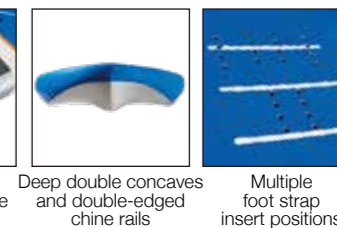

Low stringer double concave design

SPECIAL FEATURES

Twin track / foil tuning guide
Tail kick pad with visual stance reference

Deep double concaves and double-edged chine rails

Multiple foot strap insert positions

OPTION

FOIL EVATRACTION PADS

Front pad (Only)

NSP | FIREBALL NEW MODEL

The NSP Fireball is the result of months of design, development and testing by the development team. The new design offers a lightweight and rigid structure that delivers smooth and instant power that is stable under all conditions. Ride a Fireball for freeride cruising, wave riding, big air boosting and aerial antics, downwinders or go hard on a parking lot with a skateboard under your feet, or a snowboard if you're hitting the slopes.

DYNAMIC DYHEDRAL AND LIGHTER WEIGHT

The redesigned Leading Edge and Strut create a dynamic dihedral shape that promotes stability and accessible power in all conditions. Double reinforcements in the Leading Edge translates to a more rigid wing structure and less flex.

The new Fireball wings are lighter and more maneuverable than their predecessor, delivering a solid and balanced feeling. Power is readily available even in lightwind conditions, thanks to the added rigidity. The Leading Edge stitching is relocated to minimize turbulence and to protect the rider and it seams are now covered.

SUP valve for quick rigging up. NSP wings can be pumped up with any standard SUP pump

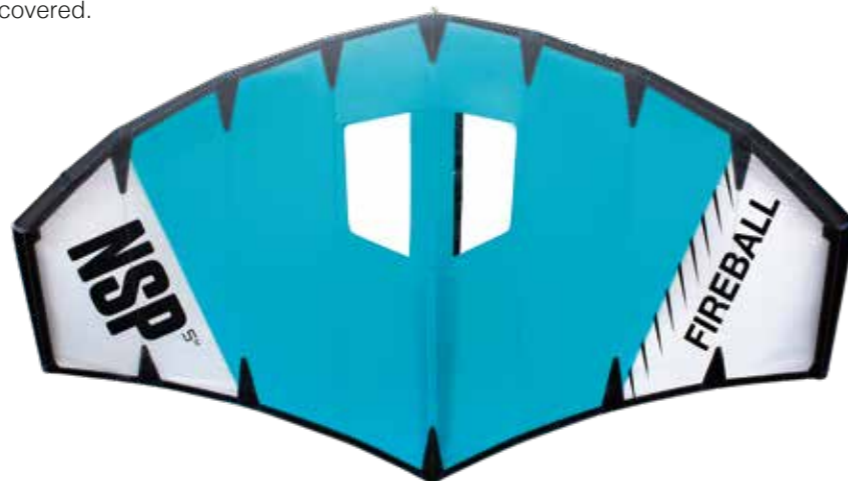

Premium Leading Edge handle for neutral wave rides or depowering your Fireball

Harness loops on the strut just in case you want to use the wing with a kite harness.

Kevlar, PVC and TPU abrasion protection along the Leading Edge protects the wing from wear and tear when making contact.

Easy bladder access points on the leading edge and wing tips.

Optimized handles for improved control: new handle design and orientation allows riders to make subtle adjustments to their hand positioning, to get the most power from their wing.

Double reinforced leading edge for added rigidity

Added reinforcements between the strut and the leading edge.

Premium Quick Release Wing Leash

Highly durable 6mm TPU coiled wing leash with integrated quick release system, double stainless steel swivels, and double layered neoprene strap.

Extra tight trailing edge minimizes leach flutter. Added batons add stability

AIRWING DOUBLE ACTION HAND PUMP

Code : 22NAI0100
本体価格 (税込)
¥8,000 (¥8,800)

Photographer : Franck Berthout

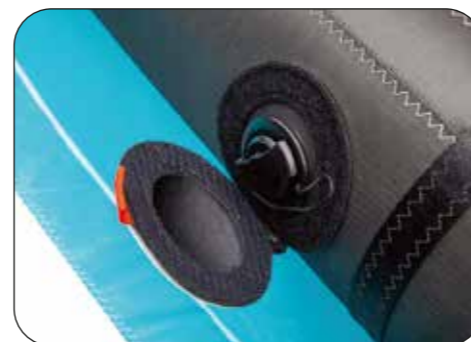

Rider : Alex Bicrel

Board : Surf Foil Pro with AirWing

Location : Maui, USA

TECHNICAL FEATURES AND MATERIALS

Halkey valves

Less time spent rigging up means more time on the water. A lightweight, high-diameter Halkey valves allows fast rigging and derigging.

Hardcore Wingtip reinforcements

To protect the wing from rougher surfaces, TPU strips with vulcanized PVC protect the wing tips from punctures and wear.

Triple stitching protection

Additional 2-ply strips and triple stitching protect the trailing edge from stretching, wear and tear or protects ripping.

Premium comfortable handles

Premium handles on the Strut and Leading Edge allow for hours of comfortable riding, sheeting in and out, giboing and getting as much power from your Fireball as possible. The Leading Edge handle is placed as neutral as possible, allowing for a complete depowered wing to be held as you focus on angled curves, downwinding and surfing.

Smart one-pump design

SUP valves that fit most SUP pumps, covered with premium PVC and velcro covers.

Premium protective materials

Kevlar, PVC and TPU abrasion protection materials to increase the life-span of the Fireball
